

# Unveiling the Secrets of the Titanic: A Data Science Odyssey to Predict Passenger Survival

N.BALA YASHASWINI

## Uncovering Titanic's Secrets

Embark on a data-driven journey to predict passenger survival on the Titanic. Let's explore the untold stories hidden in the data.

# The Data Science Odyssey

Charting a course through the data to unravel patterns and insights. A voyage of discovery through the lens of data science.

# Passenger Profiles

Unveiling the diverse backgrounds and demographics of Titanic passengers. Understanding the factors that influenced their survival.

A woman with short dark hair, wearing a black blazer over a white t-shirt and light blue trousers, is sitting on a large, glowing blue circuit board. She is looking down at a silver laptop on her lap. The background is a dark blue field filled with a complex network of glowing blue circuit lines and nodes. In the top left corner, the letters 'HTML' are written in a bold, white, sans-serif font.

# HTML

## Predictive Modeling

Harnessing the power of machine learning to forecast passenger survival. Unveiling the algorithms that unlock the secrets of the Titanic.

# Survival Factors

Delving into the key factors that determined passenger survival. From class distinctions to individual choices, decoding the enigmas of survival.

# The Legacy of Titanic

Reflecting on the enduring impact of the Titanic tragedy.  
Honoring the memories of those lost and the enduring  
lessons learned from this historic event.
